

# ANSHU SHARMA

 anshusharma27165@gmail.com  8103257228  Pune, India  Github

## Education

### Bachelor of Technology in Computer Science

2021 – 2025 | Bhopal, India

Truba Institute of Engineering and Information Technology

CGPA : 7.99

### Higher Secondary Education (Class XII)

2020 – 2021 | vidisha , India

CBSE BOARD , percentage : 81 %

## Skills

**Programming Languages :** — Python, C++

**Web Frameworks & APIs:** — Flask, REST APIs

**Databases:** — MySQL

**Containerization & DevOps:** — Docker, Git

**Concepts:** — Object-Oriented Programming (OOP), Exception Handling , Machine Learning algorithms

**Agentic AI & LLM:** — LangGraph, Groq API, Prompt Engineering, Tool Orchestration, RAG

## Projects

### ResumeIQ — Agentic Resume Analyzer

- Built a stateful agentic AI pipeline using LangGraph with 5 nodes (extraction, agent, tools, analysis, chat) that orchestrates 3 external APIs to analyze resumes against job descriptions.
- Implemented tool orchestration where an LLM autonomously decides which tools to invoke - an ATS keyword checker, Adzuna job market API, and YouTube Data API — based on identified skill gaps.
- Designed a multi-model architecture using llama-3.1-8b-instant for structured extraction and a 20b model for analysis, doubling the effective token budget while maintaining output quality.
- Built session-based chat memory allowing candidates to ask follow-up questions with full resume context preserved across turns.
- Deployed full stack application with Flask backend on Render and single-page frontend on Netlify.

### Personal Assistant - AI Talking Portfolio

- Built a RAG pipeline using ChromaDB vector database and all-MiniLM-L6-v2 sentence transformers for semantic retrieval, enabling recruiters to interactively query my background, skills, and projects in real time
- Implemented hybrid memory system combining running summarization, semantic search on conversation history, and recent turn retention — preserving context across topic changes without token bloat
- Integrated ResumeIQ as a live tool — recruiters can paste a JD and the assistant autonomously calls the ResumeIQ agentic pipeline, demonstrating two AI systems working as one integrated product
- Containerized full stack application using Docker with FastAPI async backend and session-based conversation persistence
- Deployed the containerized application on Railway, enabling scalable cloud hosting, automated deployments, and public access for recruiter demonstrations.

## Professional Experience

### Web Development Intern

06/2025 – 08/2025

Scoutbizz International

- Worked on production-level web applications and client websites.
- Customized Shopify storefronts using HTML, CSS , and liquid templates.
- Collaborated with designers and developers to improve website performance and UI.

## Certificates

Microsoft Certified : Azure Fundamentals
